Index of Subjects

Abomasum, digesta outflow, gastrointestinal activity, effect of feed intake, 387
Alcohol dehydrogenase, flavour production, fermented milks, 375
Alkylglycerols, colostrum, milk, relation to precursors, 201

Bacteria, *see also individual bacteria and types*
milk, effect of teat washing methods, 153
heat resistant, sources, 163
Blood, serum, lipoprotein, lipolysis, milk, stimulation, 309
Brine, microfiltration, cheesemaking, 503
Buffalo(es), milk, ^{32}P, ^{45}Ca, incorporation, 535

Casein(s), composition, Irish milk, 433
micelles, buffalo milk, ^{32}P, ^{45}Ca, incorporation, 535
coagulation, rennet, effect of temperature, calcium ion concentration, ionic strength, 331
serum, protein composition, 67
size, soluble casein, relationship, heated milk, 207
submicellar fraction, 37
milk proteinases, action, 45, 57
proteolysis, proteose-peptone fraction, milk, 275
Cheddar cheese, accelerated ripening, proteinase, cell-free extracts starter streptococci added, 519
flavour, effect of block size, 527
Cheese, hard, headspace analysis, 381
Cheesemaking, *see also* **Cheddar cheese**
brine, microfiltration, 503
curd, *see* **Curd**
Domiati cheese, 237
salting, Romano-type cheese, 511
Cheese ripening, accelerated, proteinase, cell-free extracts starter streptococci added, 519
proteinases, *Kluyveromyces lactis*, 469
Clostridium tyrobutyricum, Cl. butyricum, inhibition by *Debaryomyces hansenii*, 449
Coagulation, milk proteins, ethanol induced, 425
heated, homogenized milk, 291
concentrated, sulphydryl group interactions, 301
Cold storage, rennet-induced milk gels, after thermization, 231
Colostrum, alkylglycerols, relation to precursors, 201
glucose levels, 97
Cream, homogenization, effect of fat concentration, 91
viscosities, up to 135 °C, 193
Cultured milk, *Lactobacillus acidophilus, L. bulgaricus*, flavour, 375
Curd, properties, effect of homogenization, milk, 341

Debaryomyces hansenii, inhibition of *Clostridium* spp., 449
Domiati cheese, from ultrafiltered milk, lipolysed cream, 237

Fatty acids, milk, determination, 321
lipolysis, 309
Feed intake, gastrointestinal motility, digesta flow, 387
Fermented milks, *see* **Cultured milks**
Flavour, Cheddar cheese, effect of block size, 527
fermented milks, starters, *Lactobacillus bulgaricus, L. acidophilus*, 375
Foot-and-mouth disease virus, release, milk components, 17

Glucose, level, colostrum, 97
Goat, mammary gland, leucine metabolism, 413
milk, composition, rennet clotting, relationship, 215
fermentation, DL-type mixed strain starters, 349

Heat stability, *see* **Coagulation,** milk proteins, heated
Heat treatment, *see also* **Thermization**
milk, soluble casein, 207
Streptococcus lactis, activity, 357
Homogenization, cream, effect of fat concentration, 91
milk, effect on rennet curds, 341
Homogenized milk, heat stability, 291, 301
Human milk, nitrogen content, determination, 269

Intestine, myoelectric activity, digesta flow, effect of feed intake, 387
Irish milk, casein, composition, 433
Ischaemic heart disease, dietary lipids (review), 541

Kluyveromyces lactis, cheese-ripening proteinases, 469

Lactation, twin-bearing cows, 241
Lactobacillus acidophilus, starter, fermented milks, flavour, 375
L. bulgaricus, starter, fermented milks, flavour, 375
Leucine, metabolism, mammary gland, goat, 413
Lipase, acid, from *Penicillium roqueforti*, 459
from *Pseudomonas fluorescens*, determination, milk, 491
extracellular, 77
Lipids, diet, ischaemic heart disease (review), 541
Lipolysis, milk, stimulation, serum lipoprotein, 309
Live weight, gain, mammary gland, development, 405

Mammary gland, *see also* **Udder**
development, effect of rapid rearing, 405
goat, leucine metabolism, 413
Milk, bacteria, effect of teat washing methods, 153
heat-resistant, sources, 163
cell count, effect of milking machine faults, 135, 141, 149
high, proteinases, 57
components, foot-and-mouth disease virus, 17
gels, rennet-induced, effects of thermization, cold storage, 231
heat treated, sterilized, activity, *Streptococcus lactis*, 357
lipase, *Pseudomonas fluorescens*, determination, 491
penicillin, detection, 185
proteinases, 45, 57
surface tension, up to 135 °C, 259
viscosities, up to 135 °C, 193

Milk composition, alkylglycerols, relation to precursors, 201
rennet clotting, relationship, 215
soluble casein, heat treatment, 207
Milk fat, breakdown, *see* **Lipolysis**
cream, homogenization, 91
fatty acids, determination, milk, 321
triglyceride structure, 443
globule membrane (review), 107
Milk proteins, breakdown, *see* **Proteolysis**
casein-micelles, serum casein, 67
determination, human milk, 269
digestion, rat stomach, 27
Pseudomonas fluorescens, proteinase-deficient mutant, effect of, 365
Milking equipment, hygiene, assessment, 9
Milking machines, faults, automatic cell count, milk, 135, 141, 149
teatcup liner, deflector shields, udder infection, 397
short, pulsation failure, 249

Penicillin, detection, milk, 185
Penicillium roqueforti, acid lipase, 459
Proteinase, accelerated cheese ripening, 519
extracellular, heat stability, *Pseudomonas fluorescens*, 171
Kluyveromyces lactis, cheese-ripening, 469
milk, high cell count, 57
Irish, manufacturing, 433
normal, 45
Proteolysis, caseins, proteose-peptone fraction, milk, 275
Proteose-peptone, milk 275
Pseudomonas fluorescens, lipase, determination, milk, 491
extracellular, 77
proteinase-deficient mutant, 365
extracellular, thermal stability, 171

Rennet(s), coagulation, casein micelles, effect of temperature, calcium ion concentration, ionic strength, 331
milk, composition, relationship, 215
gels, effect of subsequent thermization, cold storage, 231
homogenized, properties, curd, 341
Romano-type cheese, salting, 511

Sheep, milk, composition, rennet clotting, relationship, 215
heat treated, sterilized activity, *Streptococcus lactis*, 357
Skim-milk, concentrated, ethanol stability, 425
digestion, rat stomach, 27
surface tension, up to 135 °C, 259
Staphylococcus aureus, teat, effect of disinfection, 101
Starters, goat's milk products, 349
Sterilization, milk, *Streptococcus lactis*, activity, 357
Streptococci, cell-free extracts added, cheddar cheese, accelerated ripening, 519
Streptococcus lactis, activity, heat treated, sterilized, cow-, ewe-milk, 357
hydrogen peroxide accumulation, 481
Surface tension, milk, up to 135 °C, 259

Teat, disinfectants, tests, 3
disinfection, pre-milking, 101
washing methods, milk contamination, 153
Thermization, subsequent cold storage, rennet-induced milk gels, 231
Threonine aldolase, flavour production, fermented milks, 375

Udder, *see also* **Mammary gland**
infection, shields, teatcup liner, 397

Viscosity, milk, cream, up to 135 °C, 193

Contents

No. 1 (February 1983)

PAGE

Foreword to Volume 50. J. A. B. Smith 1

Use of lyophilized skin for testing the bactericidal activity of teat disinfectants. A. J. Bramley and E. M. Hogben 3

Evaluation of the direct epifluorescent filter technique for assessing the hygienic condition of milking equipment. A. C. Hunter and R. M. McCorquodale 9

Physicochemical transformation of milk components and release of foot-and-mouth disease virus. J. H. Blackwell, P. D. McKercher, F. V. Kosikowski, L. E. Carmichael and R. C. Gorewit 17

Kinetic studies of *in vivo* digestion of bovine unheated skim-milk proteins in the rat stomach. G. Miranda and J.-P. Pelissier 27

Separation of the submicelles from micellar casein by high performance gel chromatography on a TSK-GEL G4000SW column. T. Ono, S. Odagiri and T. Takagi 37

Proteinases in normal bovine milk and their action on caseins. A. T. Andrews 45

Breakdown of caseins by proteinases in bovine milks with high somatic cell counts arising from mastitis or infusion with bacterial endotoxin. A. T. Andrews 57

Variation in the protein composition of bovine casein micelles and serum casein in relation to micellar size and milk temperature. D. T. Davies and A. J. R. Law 67

Isolation and some properties of extracellular heat-stable lipases from *Pseudomonas fluorescens* strain AFT 36. P. F. Fox and L. Stepaniak . . 77

Effects of fat concentration on the homogenization of cream. L. W. Phipps . 91

Glucose levels in bovine colostrum. L. Ahrné, L. Björck and O. Claesson . 97

Role of pre-milking teat skin disinfection in preventing *Staphylococcus aureus* mastitis. R. F. Sheldrake and R. J. T. Hoare 101

Reviews of the progress of Dairy Science. The bovine milk fat globule membrane – its formation, composition, structure and behaviour in milk and dairy products. A. V. McPherson and B. J. Kitchen . . . 107

No. 2 (May 1983)

Effect of milking machine factors on the somatic cell count of milk from cows free of intramammary infection. I. Vacuum fluctuations. G. R. Olney, G. W. Scott and R. K. Mitchell 135

Effect of milking machine factors on the somatic cell count of milk from cows free of intramammary infection. II. Vacuum level and overmilking. G. R. Olney and R. K. Mitchell 141

Effect of milking machine factors on the somatic cell count of milk from cows free of intramammary infection. III. Pulsator rate. G. R. Olney and G. W. Scott 149

Effect of teat washing on the bacteriological contamination of milk from cows kept under various housing conditions. C. H. McKinnon, R. J. Fulford and C. M. Cousins 153

A survey of sources of heat-resistant bacteria in milk with particular reference to psychrotrophic spore-forming bacteria. C. H. McKinnon and G. L. Pettipher 163

Thermal stability of an extracellular proteinase from *Pseudomonas fluorescens* AFT 36. L. Stepaniak and P. F. Fox 171

An evaluation of the Charm Test – a rapid method for the detection of penicillin in milk. S. A. Thorogood, P. D. P. Wood and G. A. Prentice 185

Dynamic viscosities of milk and cream from 70 to 135 °C. A. J. Bertsch and O. Cerf 193

Alkylglycerols in bovine colostrum and milk in relation to precursor levels. L. Ahrné, L. Björck and O. Claesson 201

Relation between micelle size and formation of soluble casein on heating concentrated milk. T. Aoki and Y. Kako 207

Chemical composition and coagulating properties of renneted milks from different breeds and species of ruminant. J. E. Storry, A. S. Grandison, D. Millard, A. J. Owen and G. D. Ford 215

Effects of thermization and cold storage on some properties of rennet-induced milk gels. D. E. Johnston, R. J. Murphy and N. R. Whittaker . . 231

Domiati cheese made with ultrafiltered reconstituted milk and lipolysed recombined cream. M. E. Abd El-Salam, S. El-Shibiny, L. A. El-Koussey and H. F. Haggag 237

No. 3 (August 1983)

A note on the lactation performance of twin-bearing cows. W. H. Broster, A. J. Clements and R. E. Hill 241

Pulsation failure as a consequence of milking with short teatcup liners. G. A. Mein, M. R. Brown and D. M. Williams 249

Surface tension of whole and skim-milk between 18 and 135 °C. A. J. Bertsch 259

Nitrogen content of human milk: limitations of spectrophotometry for the determination of protein in milk. G. J. Hudson and A. Lucas . . 269

Proteolysis of caseins and the proteose-peptone fraction of bovine milk. A. T. Andrews and E. Alichanidis 275

Effect of homogenization on the heat stability of milk. A. W. M. Sweetsur and D. D. Muir 291

Influence of sulphydryl group interactions on the heat stability of homogenized concentrated milk. A. W. M. Sweetsur and D. D. Muir. . . . 301

Serum lipoprotein stimulation of lipolysis and its relevance to free fatty acid development in bovine milk. M. Anderson and E. C. Needs . . . 309

A method for the quantitative determination of individual free fatty acids in milk by ion exchange resin adsorption and gas–liquid chromatography. E. C. Needs, G. D. Ford, A. J. Owen, B. Tuckley and M. Anderson . 321

Coagulation of renneted bovine casein micelles: dependence on temperature, calcium ion concentration and ionic strength. D. G. Dalgleish . . 331

Influence of homogenization of concentrated milks on the structure and properties of rennet curds. M. L. Green, R. J. Marshall and F. A. Glover 341

Fermentation of goat's milk by two DL-type mixed strain starters. G. Rysstad and R. K. Abrahamsen 349

Behaviour of *Streptococcus lactis* in heat treated (80 °C for 30 min) or sterilized cow's and ewe's milk. F. J. Chavarri, J. A. Nuñez and M. Nuñez. . 357

Growth of an extracellular proteinase-deficient strain of *Pseudomonas fluorescens* on milk and milk proteins. J. P. Torrie, H. Cholette, D. A. Froehlich and R. C. McKellar 365

Threonine aldolase and alcohol dehydrogenase activities in *Lactobacillus bulgaricus* and *Lactobacillus acidophilus* and their contribution to flavour production in fermented milks. V. M. Marshall and W. M. Cole . . 375

A new technique for the headspace analysis of hard cheese. J. C. Price and D. J. Manning 381

No. 4 (November 1983)

Effect of feed intake on digesta flow and myoelectric activity in the gastrointestinal tract of the preruminant calf. J. W. Sissons 387

Use of deflector shields to reduce intramammary infection by preventing impacts on the teat ends of cows during machine milking. T. K. Griffin, R. L. Williams, R. J. Grindal, F. K. Neave and D. R. Westgarth . 397

A quantitative analysis of mammary glands of dairy heifers reared at different rates of live weight gain. R. D. Harrison, I. P. Reynolds and W. Little 405

Metabolism of leucine by the isolated perfused goat udder. E. Roets, A.-M. Massart-Leën, G. Peeters and R. Verbeke 413

Factors affecting the ethanol stability of bovine skim-milk. VI. Effect of concentration. D. S. Horne and T. G. Parker 425

Casein compositional studies. III. Changes in Irish milk for manufacturing and role of milk proteinase. W. J. Donnelly and J. G. Barry . . . 433

Relationship between fatty acid composition and triglyceride structure of bovine milk fat. P. W. Parodi 443

Antagonistic activity of *Debaryomyces hansenii* towards *Clostridium tyrobutyricum* and *Cl. butyricum*. F. Fatichenti, J. L. Bergere, P. Deiana and G. A. Farris 449

Purification and properties of an acid lipase from *Penicillium roqueforti*. G. Lamberet and A. Menassa 459

Partial characterization of cheese-ripening proteinases produced by the yeast *Kluyveromyces lactis*. P. A. Grieve, B. J. Kitchen, J. R. Dulley and J. Bartley 469

Effect of fermentation sugar on hydrogen peroxide accumulation by *Streptococcus lactis* C10. R. C. Grufferty and S. Condon 481

A fluorimetric method for the determination of *Pseudomonas fluorescens* AR11 lipase in milk. D. Stead 491

Microfiltration of cheese brine. U. Merin, S. Gordin and G. B. Tanny . . 503

Sodium chloride and moisture changes in Romano-type cheese during salting. T. P. Guinee and P. F. Fox 511

Accelerated ripening of Cheddar cheese with a commercial proteinase and intracellular enzymes from starter streptococci. B. A. Law and A. S. Wigmore 519

Effect of reducing the block size on the flavour of Cheddar cheese. D. J. Manning, E. A. Ridout, J. C. Price and R. J. Gregory . . . 527

Incorporation of ^{32}P and ^{45}Ca into milk and casein micelles of a buffalo (*Bubalus bubalis*) following intramuscular injection. A. Bhushan, S. Singh and S. P. Ahuja 535

Reviews of the progress of Dairy Science: Dietary lipids and ischaemic heart disease. M. E. Coates 541
